We handle the details.
So you can focus on the
bigger picture.

“Infinity from Marvin is focused on providing you with a complete window replacement experience that always exceeds your expectations.

We deliver on this promise through partnerships with local experts who know your community, climate and other essentials. And we back it up with advanced building materials and design details that endure the test of time. Because some decisions should only be made once.”

Dan Marvin
President — Infinity from Marvin

OUR PARTNERS

We only partner with local experts

Hand selected

Infinity from Marvin hand-selects our independent retail partners for their decades of experience and service in your local community.

Family values

Our partners are family-run enterprises that give back to your community. Their future business depends on your satisfaction.

Expert guidance

Infinity's partners understand your unique local codes, climate considerations and installation needs.

Infinity from Marvin streamlines your entire window replacement project — from start to finish

1. Expert consultation

An Infinity expert will provide a complete consultation to determine your specific needs — including climate considerations and other factors. They will answer all your questions and provide a detailed, custom project quote based on your specifications.

2. A perfect fit

A measure technician will review your order, measure your openings and verify your installation needs. Your windows will then be built to your exact needs and specifications.

3. Seamless installation

Installation professionals will remove and dispose of your old windows, and replace them with your custom Infinity windows.

4. Built for Life®

From our Limited Lifetime Warranty to our partners' unparalleled customer service, we go above and beyond to ensure your windows provide a lifetime of optimal performance.

INSTALLATION OPTIONS

Creating the best fit for your home

Depending on the age and style of your home, Infinity offers two window replacement methods. Your local Infinity partner will help you determine the best solution for your home, including addressing any concerns about water or structural damage. Both methods are designed for maximum efficiency and minimal disruption to your home.

01

Full-frame replacement

If you have concerns about water or structural damage, full-frame replacement is the appropriate installation method. During a full-frame installation project, the entire window and trim is removed and replaced. Full-frame replacement is also used for new window styles or enlarging your existing opening for a bigger view.

02

Insert replacement

Insert replacement is an efficient approach if your existing window frames are in good condition and you only need to replace your sash and hardware. Our insert solution installs directly into your existing window frame with no disruption to existing trim, interior walls or exterior siding.

“I love the experience that we had because there was no pressure. We really wanted information and we wanted to be able to digest that information and make a decision.”

Vince & Teresa S.
Owners of home featured above

Infinity uses fiberglass for unmatched performance. But that's only the beginning.

Replacement windows have always been our sole focus. And that means we pioneered the use of materials like fiberglass that simply outperform and outlast other options. However, Infinity goes even further with Ultrex® — our proprietary fiberglass solution that offers unsurpassed durability and timeless style.

How Ultrex fiberglass measures up

We created Ultrex® with one goal in mind: develop the most durable window material in the industry. It's not only 8 times stronger than vinyl — it resists expanding and contracting in any climate. So you get a tight, snug fit that will last.

PERFORMANCE

A fit that never quits

Ultrex fiberglass expands at virtually the same rate as glass, so our windows stay tight and true. This makes Infinity windows resistant to leaks, seal failures and stress cracks that can compromise energy efficiency and long-term performance.

STRENGTH

Stands up to the pressure

Compared to other materials, Ultrex is the strongest window framing material in the replacement industry. This means Ultrex resists bending and flexing — that's confidence Fibrex® and vinyl simply can't match.

01

Ultrex vs. Vinyl Windows

Vinyl can warp and shift under everyday conditions — potentially making vinyl windows difficult to open and close and affecting their all-around performance. Ultrex resists sticking, swelling and warping so Infinity windows and doors will continue to easily open and close.

02

Ultrex vs. Wood Windows

Wood windows offer classic beauty that, depending on the environment, can require maintenance and care. Infinity windows built with Ultrex capture the beautiful details and profiles of wood — without the maintenance.

Ultrex is stable like the glass in your window

Vinyl expands at a much higher rate than glass which may compromise your window's performance.

Ultrex is 8x stronger than vinyl

Ultrex offers superior bend and flex resistance to protect the integrity of your home.

Timeless design with an attention to detail

Ultrex® fiberglass not only provides unmatched durability compared to other window replacement materials — it also makes a lasting impression both inside and out. From narrower profiles that deliver bigger views and more daylight to color options that resist fading, Ultrex simply delivers.

More view for your money

Because Ultrex is so strong, we actually use less of it in Infinity window frames. That means you get more daylight and greater views outside, without bulky frames getting in the way.

ULTREX

VINYL

Beauty that lasts

Infinity's proprietary, high-performance, co-extruded finishing process is unlike anything else in the industry. Our thick, even acrylic finish is free of pinholes, striations and imperfections and will resist scratches, fading and chalking to retain its original beauty.

ULTREX

COMPETITOR

A finish that resists fading

Want long-term color retention in a variety of styles? Ultrex uses an acrylic finish that is fade-resistant and virtually maintenance-free.

With a finish that's 3 times thicker than competitive options, Ultrex resists chipping, denting or peeling.

ULTREX

COMPETITOR

Energy Efficiency

Replacing your windows can help reduce utility bills and improve your home's comfort. Ultrex® fiberglass is far less thermally conductive than aluminum (5000x less) and insulates much like wood. This means that Ultrex provides an insulating barrier against extreme weather temperatures, keeping your home comfortable and helping to reduce heating and cooling costs.

68-72%

Average return on investment in new windows and doors when selling your home.⁴

SUSTAINABLE DESIGN

An investment that pays

Infinity products have one of the highest performance ratings from the National Fenestration Rating Council (NFRC), the organization that defines energy performance ratings for the window and door industry.

ENERGY STAR

Infinity products are ENERGY STAR® qualified.³ Choose our ENERGY STAR certified windows and doors to save on energy bills when replacing single pane windows.¹

Longer life expectancy

Fiberglass windows have a **longer useful life expectancy** than vinyl.²

1. Savings reflects installing ENERGY STAR certified products compared to non-certified when replacing single pane windows based on the average savings among homes in modeled cities. Actual savings will vary by product type, location, method of installation, individual home characteristics, local climate and conditions, utility rates and other factors. https://www.energystar.gov/products/building_products/residential_windows_doors_and_skylights/benefits

2. "Life cycle assessment of windows for the North American residential market: Case study" by the University of British Columbia. Scandinavian Journal of Forest Research, 2008.

3. ENERGY STAR at energystar.gov

4. "2020 Cost vs Value Report" Remodeling, <http://remodeling.hw.net/cost-vs-value/2020>

Terms and Definitions

Frame

Stationary portion of a window or door with three components: header across the top, jambs down each side and sill across the bottom.

Lite

Each area of glass is called a lite, and Infinity offers divided lite patterns to match the look of your home.

Panels

The operating and/or stationary portion of the door that holds the glass and is separate from the frame.

Rail

The horizontal part of a sash, door panel or screen.

Sash

The operating and/or stationary portion of the window that holds the glass and is separate from the frame.

Stile

The upright or vertical members of the framework of a sash, door, screen or other panel assembly.

Infinity Double Hung in Stone White interior with White hardware

Double and Single Hung

A window classic updated for modern performance

If you struggle to lift open your single or double hung windows or have to use a dictionary to keep them propped open, you'll be amazed at the smooth, effortless operation of the Infinity Double and Single Hung. The strength and stability of our Ultrex® fiberglass frame means your new Infinity windows will open and close effortlessly for years to come.

When we designed the Infinity Double and Single Hung, we added all the character and traditional details of wood windows — with a sleek frame for contemporary appeal. Thoughtful touches like our easy tilt operation means you'll be able to clean your Infinity Double and Single Hung from the interior of your home.

Cleaning made easy

- [01](#) Unlock and raise the sash slightly.
- [02](#) Press the tilt release button and slide the lock lever over the button.
- [03](#) Tilt the sash into the room for easy cleaning without screen removal.

Infinity Slider in Stone White interior with White hardware

Slider

A smooth operating space-saver

The Infinity Slider (also commonly referred to as a Glider) is the perfect option if your existing glider refuses to “slide” open or you have a space where a swinging sash would get in the way.

Whether installed in your family room or on a four-season porch, the Infinity Slider’s smooth sash rollers let you easily open it to invite a breeze into your home. Our Ultrex® frame seals tightly against air and water infiltration — making it both durable and energy efficient.

Cleaning made easy

Cleaning the Infinity Slider is easy with our tilt latch. Simply slide the sash open, operate the tilt latch, remove, clean and reinsert.

Infinity Casement in Stone White interior with White hardware

Casement and Awning

A better view for optimal performance

The Infinity Casement offers unlimited views with a slim profile and a sash that swings open to invite the outdoors in. Our engineers optimized the Casement to tightly seal out wind and water for energy-efficient performance — and smoothly crank open and close.

Choose the Infinity Awning when you want to maximize light in a space that requires you to reach to open a window — especially over a kitchen sink. Or, pair the Awning with Casement or Picture to add architectural interest and airflow to your home.

The Infinity Casement and Awning feature multi-point locking systems and folding handles that tuck conveniently out of the way of most window treatments for a clean, finished look.

EASY WASH HINGE

CLEAR VIEW HINGE ¹

Casement Hinges

The standard Easy Wash® hinge is just that — a design that lets you easily clean the window both inside and out. The optional Clear View® hinge provides for an expanded viewing area.

Infinity Special Shape in Stone White interior

Special Shapes and Round Tops

A strong improvement to your view

Whether you are looking to add visual interest to a room or are simply replacing an old window, Infinity Special Shapes and Round Tops are a stunning addition to any space. Adding an Infinity Round Top above a standard window or door instantly adds light and style to your home.

Achieve open views and abundant natural light with Infinity Special Shapes, available in a variety of styles from stand-alone Picture windows that span up to 10 feet to geometric combinations that give you design flexibility.

Sliding Doors

Doors to complete your vision

Open up your home to better views with the Infinity Sliding French or Sliding Patio Door, designed to coordinate with Infinity windows or add immediate design impact all on their own. With thoughtful design and smart engineering features, you'll appreciate the smooth operation and reliable performance that an Infinity door brings to your home.

The Infinity Sliding French Door (shown directly to the left) combines the look of a classic French door's wider profile with the space-saving benefits of a sliding patio door.

The Infinity Sliding Patio Door (shown on the opposite page) features a narrow profile for a contemporary appearance. The large glass area will fill your home with a bigger view and more daylight.

TOP-HUNG SCREEN

FOOTBOLT

Swinging Doors

Bring the outdoors in

Enter or exit your home in style with the Infinity Inswing French Door. Our Inswing French Door is a great design choice for a room that offers plenty of space to open the door panels.

The Inswing French Door blends the ultimate performance of Ultrex® fiberglass with timeless design features — the wider profile is a nod to traditional architecture, with Ultrex strength and performance offering a modern twist.

Multi-point locking system

Stainless steel multi-point locking system secures the door in four locations — head, sill, deadbolt and keyed cylinder — for stability and security.

EverWood

EverWood®, our breakthrough engineered wood grain interior finish, offers natural looks and textures — combined with the durability you expect from Infinity. It looks, feels, paints and stains like wood but is completely low maintenance.

Durable and low maintenance

Long-lasting EverWood is made from an inorganic material, so it won't absorb moisture or decay over time. That means there's virtually no warping, discoloration, material degradation, expansion or contraction — just remarkably reliable performance and lasting beauty, year after year.

Match your existing woodwork or take your home in a new design direction with EverWood.

GLAZING OPTIONS

Low E insulating glass coatings

Extremely thin coatings of special low emissivity (Low E) metallic material are applied to glass panes to boost their energy efficiency and block out UV rays. Since glass choice plays a big factor in window and door efficiency, your local Infinity partner can provide recommendations on the best selection for your home.

Low E1

Primarily used in colder climates, Low E1 allows more heat in to warm a room while blocking heat loss.

Low E2

Low E2 offers year-round performance in moderate climates. It will help retain heat in your home during the winter and keep heat out during the summer. It also blocks 84% of the sun's UV rays to reduce fading.

Low E3

Low E3 rejects solar heat while letting light in, resulting in increased performance in climates with intense sun exposure. It also blocks up to 95% of the sun's damaging UV rays.

Low E3/ERS

With an extra metallic layer on the room-side glass to reflect escaping heat back into the room, Low E3/ERS provides maximum efficiency year round in all conditions.

Specialty Glass

01

Tempered Glass

Increases glass strength to help prevent breakage. This option is ideal for windows that are close to the floor or located in high-traffic areas.

02

Laminated Glass

Even more durable than tempered glass, laminated glass is often referred to as impact resistant or safety glass due to its vinyl interlayer that tends to remain in place when cracked.

03

STC/OITC Glass

Sound Transmission Class and Outdoor-Indoor Transmission Class Glass has increased pane thickness, ideal in areas where exterior noise is a concern.

Grilles and Divided Lites

SIMULATED
DIVIDED LITES

GRILLES
BETWEEN THE GLASS

Simulated Divided Lites¹

Our Simulated-Divided-Lite (SDL) bars are built with Ultrex® fiberglass. Permanently adhered in our factory to the outside surfaces of the glass, SDLs have a spacer bar between the panes of glass to offer the traditional look of divided lites.

Grilles Between the Glass²

Located between the panes of insulating glass, Grilles-Between-the-Glass (GBG) combine easy cleaning with the timeless detail of a grille pattern.

Patterns

We offer various divided lite patterns so you can replicate the look of your original windows and doors – or add new architectural interest to your home.³

Infinity Limited Lifetime Warranty

Even though Infinity products are Built for Life®, we proudly offer a Limited Lifetime Warranty to give you peace of mind. It's our pledge to you that we will stand behind our products for as long as you own your home. Because some decisions, like replacing your windows, should only be made once. For full details on our Limited Lifetime Warranty, visit infinitywindows.com.

Infinity. Living up to the Marvin legacy.

Marvin is proud to have provided customers across the U.S. with quality windows and doors for over 100 years. But we're not content to rest upon our heritage. We created Infinity from Marvin to provide homeowners with a new way to shop for replacement windows — centered on providing ease, confidence and a quality experience every step of the way.

Have questions? We can help.

Choosing the right replacement windows for your home can seem challenging. We know replacing your windows is an investment of your time and money, and our local independent partners are ready to help. Thank you for considering Infinity from Marvin for your home.

Call 1-888-206-1332 for the Infinity from Marvin local independent partner nearest you. In Canada, call 1-800-263-6161. Or visit us at infinitywindows.com.
